### **Notice Regarding the Official Launch of Our AI Cloud Stack “TAIZA”**

Datasection Inc. has been advancing the development and implementation of its AI cloud service system (tentatively names “DS Cloud Stack”), which enables the operation of AI data centers at a hyperscaler level. This initiative is part of the company’s efforts to expand its new strategic core business – AI data centers – as previously announced in the “Notice Regarding Conclusion of Joint Development Agreement” dated August 19, 2024. We are pleased to announce that, following the successful completion of operational testing by our clients, the DS Cloud Stack has officially launched as of today. Furthermore, we would like to inform you that the provisional name of the product and service has been officially confirmed as “TAIZA”, as outlined below.

#### **1. Product and Service Name**

“TAIZA”

#### **2. Key Features**

- Optimization algorithms for managing large-scale GPU clusters for AI
- Inference via API integration with various AI models
- Operation within a private cloud environment

#### **3. Future Prospects**

The impact on the Group’s business performance includes revenue from the operational testing of the project, which will be recorded in the current fiscal year.

However, the consolidated financial results for the current fiscal year are still under review. Should there be any material impact requiring disclosure in relation to the current earnings forecast, we will make an announcement promptly.

The impact on the next fiscal year’s performance will be reflected in the consolidated earnings forecast to be included in the financial results for the fiscal year ending March 2025, scheduled for release on May 15, 2025.
