

7 May 2026

PRESS RELEASE

Datasection Inc.

Datasection Strengthens Strategic Collaboration with Compal to Accelerate the Development of a State-of-the-Art AI Data Centre

Datasection Inc. (Head Office: Shinagawa-ku, Tokyo; Representative Director, President & CEO: Norihiko Ishihara; TSE Growth: 3905; hereinafter “the Company”) hereby announces that, based on its business alliance with Compal Electronics, Inc. (“Compal”), and as disclosed in its announcement dated 7 May 2026 titled “Notice Regarding the Acquisition of Fixed Assets (GPU Servers Equipped with NVIDIA B300)”, the Company has resolved to acquire and has entered into a purchase agreement for a total of 635 GPU servers equipped with NVIDIA’s latest architecture, “NVIDIA B300” (comprising an aggregate of 5,080 GPUs).

The total investment amounts to approximately USD 325 million (approximately JPY 51.6 billion). This investment will serve as the core infrastructure of the Company’s State-of-the-Art AI data centre project and is expected to deliver industry-leading computational capacity at scale to meet the demands of the world’s largest cloud service providers, including key customers for this project.

Strategic Global Partnership with Compal

Headquartered in Taiwan, Compal is one of the world’s largest original design manufacturers (ODM) and a global Tier 1 partner supporting NVIDIA’s latest AI infrastructure.

This partnership extends well beyond conventional hardware procurement and delivers the following critical strategic advantages to the Company:

- **Stable access** to scarce, State-of-the-Art GPUs

Amid a global surge in demand and constrained supply, the Company has secured priority and stable access to NVIDIA’s latest “B300” architecture through Compal’s robust supply chain.

This enables the Company to minimise delivery delays and ensure the timely launch of its AI data centre operations.

- **World-class server design and technical expertise**

By leveraging Compal’s extensive experience in high-density server design and advanced thermal management, the Company will be able to maximise the performance of State-of-the-Art GPUs and establish a highly efficient AI computing platform.

- **Proof of global credibility and reliability**

The strong collaboration with Compal, a world-leading manufacturer, serves as a clear validation that the Company’s AI infrastructure business meets global standards in both quality and supply

capability.

This positions the Company to deliver a high level of reliability to the world's largest cloud service providers, including its key customers.

Competitive Advantage

This partnership represents the Company's decisive and sustainable competitive advantage in the rapidly accelerating AI market, enabling it to maintain a decisive lead in both speed of execution and the ability to supply large-scale computational resources.

Outlook

The Company will leverage its strong partnership with Compal as a cornerstone to firmly establish its position as a key supplier of AI computing capacity in Japan and across Asia, while significantly accelerating the enhancement of long-term shareholder value.

Company Overview

Compal Electronics, Inc.

<https://www.compal.com/en-us/>

- Head Office: No. 581 & 581-1, Ruiguang Rd., Neihu District, Taipei City 11492, Taiwan (R.O.C.)
- Representative: Chairman, Jui-Tsung Chen
- Business Description: Design, manufacturing, and sale of 5C electronic products (including notebook computers, servers, and related devices)
- Established: 1 June 1984

Datasection Inc.

- Head Office: Gotanda PLACE 8F, 1-3-8 Nishi-Gotanda, Shinagawa-ku, Tokyo, Japan
- Representative: Norihiko Ishihara, Representative Director, President & CEO
- Business Description: AI data centre infrastructure, data science, system integration, and marketing solutions
- Established: 11 July 2000
