PRESS RELEASE

Datasection Inc.

Datasection Unveils “OHMAI” to the World at VivaTech 2026

A Pocket-Sized AI Sidekick Integrating the World’s Leading AI Models into One Seamless Experience — Global unveiling announced at Viva Technology 2026 in Paris

Datasection Inc. (Head Office: Shinagawa-ku, Tokyo; Norihiko Ishihara, Representative Director, President & CEO; TSE Growth: 3905; hereinafter “Datasection”) today announced the global unveiling of “OHMAI”, a next-generation AI sidekick device that brings multiple leading AI models into one seamless experience, at Viva Technology 2026 (“VivaTech”), one of Europe’s largest technology events, held in Paris, France on 17 June 2026 (local time).

During the event, Datasection Representative Director, President & CEO Norihiko Ishihara took to the stage to present the company's vision for a future in which AI and people coexist and collaborate naturally, and how OHMAI will help bring that vision into everyday life.

Designed as an AI companion that prioritises user control above all else, OHMAI delivers a new AI experience designed to fit naturally into everyday life and workspaces.

Background: Solving the Fragmentation of the AI Landscape

Today, leading AI systems such as ChatGPT, Claude and Gemini are rapidly transforming the way people work and create.

At the same time, as competition among AI models intensifies, the era in which users are locked into a single model is coming to an end. Instead, we are entering a new phase in which users will increasingly rely on multiple AI models depending on the task at hand.

However, this shift has also introduced a new layer of complexity. Users are now required to manage multiple accounts, subscriptions and AI services, while constantly deciding which model is best suited for each task. Logging into different platforms, handling fragmented subscriptions and managing separate API keys have become increasingly cumbersome.

Datasection developed OHMAI to eliminate this technical complexity behind the scenes and create an exceptionally simple, refined user experience in which users can simply speak naturally and receive support from the most suitable AI automatically.

Key Features of OHMAI

➤ **One Simple AI Experience: Access to Multiple Leading AI Models Through a Single Account**

With just one Datasection account, users can seamlessly access many of the world's leading AI models. The platform is expected to continue expanding with additional frontier AI models as they become available.

The platform removes the friction of separate logins, fragmented subscriptions and the management of multiple API keys across different services.

➤ **Smart Routing: Automatically Selecting the Best AI for Each Task**

For requests made via voice, text or images, Datasection's AI orchestration platform, TAIZA, intelligently routes requests to the most suitable AI model, enabling secure and efficient execution across multiple AI systems.

➤ **A Warm, Physical Presence Beyond the Screen**

OHMAI is a compact, palm-sized AI device designed to exist naturally on a user's desk as an ambient AI presence.

Unlike AI that exists only within applications or screens, OHMAI allows users to interact naturally through conversation at any time, creating a more intuitive and human-centred experience.

➤ **An AI Sidekick That Helps Move Daily Workflows Forward**

From writing and editing documents, conducting research and summarising information, to scheduling, language learning and answering everyday questions, OHMAI supports both work and daily life across a wide range of situations.

Rather than functioning as a fully autonomous AI that acts independently without oversight, OHMAI is designed as a collaborative companion that keeps users in control while helping them move tasks forward more comfortably and efficiently.

Two Device Lineups and a Simple Subscription Model

To accommodate different lifestyles and user needs, OHMAI will be offered in two hardware models.

Model	Price (One-Time Purchase)	Description
OHMAI Light	USD 9.99	A compact starter device designed for first-time AI device users and ideal as a thoughtful gift.
OHMAI Pro	USD 99.99	A premium AI robot companion featuring a richer physical presence together with high-quality microphones and speakers, designed for desk workers, families and power users.

Subscription Plan

- Monthly Subscription Fee: USD 3.99 per month
- Included Services: Access to all supported AI models. Users no longer need to manage separate subscriptions or complex billing structures across multiple AI services.
- Launch Promotion: To celebrate the global launch, OHMAI will be offered with a free first month subscription.

Interest Registration Now Open

Individuals interested in OHMAI are invited to register their interest via the official website below to receive the latest product updates and information regarding future availability.

- OHMAI Official Website: <https://ohmai.com>

※Personal information collected through registration for the waiting list will be jointly used by Datasection Inc., which is responsible for the development and supply of OHMAI; MSS Co., Ltd., which is responsible for the authorised sale of OHMAI; and Solid Intelligence Inc., which is responsible for market development and promotional activities. For further details, including the purposes of such joint use and the entity responsible for managing the jointly used personal information, please refer to the Privacy Policy on the dedicated OHMAI website.

Future Roadmap

Following its global debut at VivaTech 2026, OHMAI will be rolled out progressively across major international markets, beginning with the United States, Europe and Japan.

Datasection plans to evolve OHMAI far beyond the capabilities of a traditional conversational AI assistant.

Future updates are expected to introduce AI-powered workflows capable of executing tasks and actions with explicit user approval. The company also plans to further expand the platform through deeper contextual awareness, enhanced personalisation, multi-device compatibility and broader integrations with productivity tools and digital services.

Over the mid to long term, Datasection aims to establish OHMAI as the foundation of a highly personalised “Personal AI OS” — an intelligent companion layer that seamlessly supports users across both work and daily life while maintaining user autonomy and control.

Ultimately, Datasection envisions OHMAI evolving into a personalised AI operating layer that supports users seamlessly across work, communication and everyday living.

Comment from Norihiko Ishihara, Representative Director, President & CEO of Datasection

“We are now entering the next decade of AI — moving beyond simply competing over which model is superior, towards a future where intelligence becomes seamlessly integrated into business and everyday life.

VivaTech 2026, where cutting-edge innovation from around the world converges, provides the ideal global stage to introduce a new vision of AI originating from Japan.

OHMAI is designed to move beyond the screen and become a next-generation companion that supports people naturally throughout their daily lives. We are confident that OHMAI will redefine everyday life around the world, making it smarter, richer and more connected.”

About Viva Technology 2026

Viva Technology (“VivaTech”) is one of Europe’s largest technology and startup events, bringing together leading innovators, entrepreneurs, investors and global technology companies from around the world.

The 2026 edition is expected to welcome approximately 180,000 attendees, 14,000 startups and 3,600 investors from across the globe.

Viva Technology 2026 – Event Overview

- Event Name: Viva Technology 2026 (“VivaTech”)
- Dates: 17 June – 20 June 2026
(Opening hours: 9:00–18:00 local time / 8:30 opening on 17 June only)
- Venue: Paris Expo Porte de Versailles, Hall 7
(1 Place de la Porte de Versailles, 75015 Paris, France)
- CEO Session: Stage One / 17 June 2026 / 11:55 AM – 12:20 PM (local time)
- Organisers: Publicis Groupe / Groupe Les Echos
- Scale of Event: Approximately 180,000 attendees / 14,000 startups / 3,600 investors
- Official Website: <https://vivatechnology.com/>

About Datasection Inc.

Datasection Inc. is a Japan-based AI infrastructure company focused on AI cloud platforms, data science and system integration.

- Headquarters: Gotanda PLACE 8F, 1-3-8 Nishi-Gotanda, Shinagawa-ku, Tokyo, Japan
- Representative: Norihiko Ishihara, Representative Director, President & CEO
- Established: 11 July 2000
- Tokyo Stock Exchange Growth Market: 3905
