PRESS RELEASE

Datasection Inc.

Datasection Signs Memorandum of Understanding on Long-Term Use of GPU Computing Resources for AI Data Centre Project in Thailand

Datasection Inc. (Head Office: Shinagawa-ku, Tokyo; Representative Director, President and CEO: Norihiko Ishihara; TSE Growth Market: 3905; hereinafter, the “Company”) hereby announces that it has entered into a memorandum of understanding with a major U.S.-headquartered AI infrastructure platform provider (hereinafter, the “Prospective User”) regarding the use of GPU computing resources for the AI data centre project currently being developed by the Company in Thailand.

At the request of the Prospective User, its company name is not being disclosed at this time.

Background

The Company is currently advancing an AI data centre project in Thailand.

As the adoption of generative AI continues to expand, global demand for large-scale GPU computing resources is increasing. Against this backdrop, the two companies have entered into this memorandum of understanding in order to proceed with discussions regarding the long-term use of GPU computing resources at the AI data centre.

Overview

Item	Details
Date of execution	26 August 2026
Counterparty	A major U.S.-headquartered AI infrastructure platform provider
Subject	Use of GPU computing resources
Project location	AI data centre project currently being developed by the Company in Thailand
Scale under discussion	Up to 5,000 NVIDIA B200 GPUs
Contract term under discussion	36 months from the service commencement date to be specified in the definitive agreement

Based on this memorandum of understanding, the two companies will proceed with discussions toward the execution of a formal Master Services Agreement (“MSA”).

Specific terms, including scale, contract period, and pricing, will be discussed going forward.

These commercial terms are not legally binding and may be subject to change prior to the execution of the MSA.

Comment from Norihiko Ishihara, Representative Director, President and CEO of Datasection Inc.

“We are very pleased to have entered into this memorandum of understanding with a company operating a global AI infrastructure business, with a view to the long-term use of GPU computing resources **for the AI data centre project** we are developing in Thailand.

As the adoption of generative AI continues to expand and global demand for high-performance GPU computing resources increases, we expect that combining the counterparty’s expertise and established capabilities in the AI infrastructure sector with the large-scale GPU computing platform currently being developed by Datasection will create new business opportunities.

We regard the execution of this memorandum of understanding as an important step toward building a long-term relationship between the two companies, and we will continue working toward the realization of the AI data centre project in Thailand.”

Outlook

The Company will continue discussions with the Prospective User toward the execution of a definitive agreement, while accelerating the development of the AI data centre project in Thailand.

Should any matters requiring disclosure arise in the future, the Company will make an announcement promptly.
