Notice Regarding a Major Order Expected to Become Effective

Datasection Inc. (the “Company”) hereby announces that it has received a major order from a U.S.-based AI infrastructure company serving enterprise customers (the “Customer”) for the provision of GPU cluster capacity at an AI data centre planned to be established by the Company and its group companies, as outlined below.

An initial payment is scheduled to be made as a deposit by 25 September 2026. The order will become effective upon receipt of the initial payment.

1. Details of the Order

Customer	A U.S.-based AI infrastructure company serving enterprise customers At the request of the Customer and due to confidentiality obligations, the Customer's name has not been disclosed. There are no capital, personnel or business relationships (other than this transaction) between the Company and the Customer, and the Customer is not a related party of the Company.
Details of Order	Provision of access to servers equipped with NVIDIA GPUs
Order Value	USD 175.2 million per annum (USD 525.6 million in total over three years; USD 876 million in total over five years) (Note 2)
Contract Term	Three years, with an option for the Customer to extend the term by up to an additional two years
Scheduled Commencement of Service	Service will commence in phases from October 2026, with full capacity scheduled to be made available in November or December 2026.

Notes:

1. Of the USD 255.4 million in outstanding acquisition costs for GPU servers yet to be acquired, the Company plans to fund USD 131.4 million with the deposit relating to this order and USD

124 million through borrowings. The Company is currently in discussions with prospective lenders regarding the execution of agreements for such borrowings.

2. Based on the closing exchange rate of JPY 159.73 per USD as of 31 August 2026, the order value is equivalent to JPY 27,984 million per annum, JPY 83,954 million in total over three years, and JPY 139,923 million in total over five years.

3. The Company will initially be the contracting party; however, its contractual position may subsequently be transferred to a wholly owned overseas subsidiary of the Company.

4. At the express request of the Customer and due to confidentiality obligations, the location of the data centre relating to this order, as well as the model and number of NVIDIA GPUs, have not been disclosed.

2. Outlook

The project relating to this order is already reflected in the Company's previously announced consolidated earnings forecast for the fiscal year ending March 2027. While the phased commencement of service has been delayed from July 2026, which was the timing assumed in preparing the consolidated earnings forecast, the contract unit price has exceeded the level originally assumed.

As a result, while net sales attributable to this project for the current fiscal year are expected to be lower than initially projected, profit is expected to exceed the initial projection. Taking into account recent business performance and the progress of other projects, should it become necessary to revise the Company's consolidated earnings forecast for the current fiscal year, the Company will promptly disclose such revision.
