PRESS RELEASE

Datasection Inc.

CyberGym Founder and CEO Ofir Hason to Join Datasection

Datasection Inc. (Head Office: Shinagawa-ku, Tokyo; President, Representative Director, Executive Officer and CEO: Norihiko Ishihara; TSE Growth Market: 3905; hereinafter the "Company") is pleased to announce that Ofir Hason, Founder and CEO of CyberGym, will join the Company. He will help improve the safety and reliability of the Company's global AI infrastructure business and strengthen its security framework.

Background and Purpose

The Company operates AI data centers in Japan, Thailand, Australia and other regions, building and providing AI computing infrastructure globally.

As AI spreads across business and society, the AI data centers that support it must deliver more than high processing power. They must also be safe, reliable and stable. Cybersecurity has become a critical operational issue, especially for AI data centers that provide large-scale GPU computing environments.

The AI infrastructure behind large-scale GPU computing consists of multiple systems, including GPU servers, networks and various management systems. As cyberattacks grow more advanced and sophisticated, stable operation of this infrastructure requires comprehensive security measures, such as preventing unauthorized access and addressing system vulnerabilities.

Service outages or data breaches caused by cyberattacks can also affect customers' business operations. In addition to technical defenses, organizations therefore need to strengthen their

overall response capabilities through continuous risk assessment, rapid incident response and practical training.

Against this backdrop, the Company has invited Ofir Hason, Founder and CEO of CyberGym, who has extensive experience in critical infrastructure protection and cybersecurity, to join. CyberGym is a cybersecurity company headquartered in Israel, a country with one of the world's leading cybersecurity industries, built on technology and talent developed in the field of national security. CyberGym specializes in critical infrastructure protection and hands-on cybersecurity training, and helps companies and organizations improve their ability to respond to cyberattacks.

The Company will draw on his expertise and experience to enhance the security of the AI infrastructure and AI computing services it provides. It will also further strengthen the safety, reliability and business continuity of its global AI infrastructure business.

Profile

Founder and CEO of CyberGym, one of the world's leading cybersecurity companies. With more than 25 years of experience in cybersecurity, he held positions including Head of the Technology and International Relations Division at a national security organization within the Israeli Prime Minister's Office, where he worked on protecting national critical infrastructure and on cybersecurity. After founding CyberGym, he expanded its hands-on cybersecurity training for critical infrastructure globally. He also has a track record in cloud security through collaborations with AWS and Microsoft.
The Company expects him to apply his expertise in national-level critical infrastructure protection and cloud security to advance the security of its AI data centers and cloud services.

Comments

Norihiko Ishihara, President, Representative Director, Executive Officer and CEO

"AI data centers are becoming critical infrastructure for society and industry. Cybersecurity is therefore essential to stable business operations and to earning our customers' trust.
We are delighted to welcome Ofir Hason, who brings extensive experience and expertise in critical infrastructure protection and cybersecurity. Drawing on his knowledge and experience, we will further improve the safety and reliability of our global AI data centers and AI computing services, and build a robust security framework that supports sustainable business growth."

Ofir Hason

"As data centers become the backbone of the AI economy, they are increasingly targeted by cyberattacks—mainly through the supporting systems(Energy, cooling systems, OT, ETC) and supply chains they depend on. Drawing on my experience protecting national critical infrastructure and leading hands-on cybersecurity operations, I will help strengthen resilience

across these interconnected environments and build AI infrastructure that customers worldwide can trust.”

■ Company Overview

Datasection Inc.

Head Office:	8F Gotanda PLACE, 1-3-8 Nishi-Gotanda, Shinagawa-ku, Tokyo, Japan
Representative:	Norihiko Ishihara, President, Representative Director, Executive Officer and CEO
Business Activities:	AI infrastructure, data science, system integration and marketing solutions
Established:	11 July 2000
